

National Electronics Complex of Pakistan

INFORMATION SECURITY

ARTIFICIAL INTELLIGENCE

INTEGRATED SECURITY SOLUTIONS

EMBEDDED SOFTWARE DEVELOPMENT

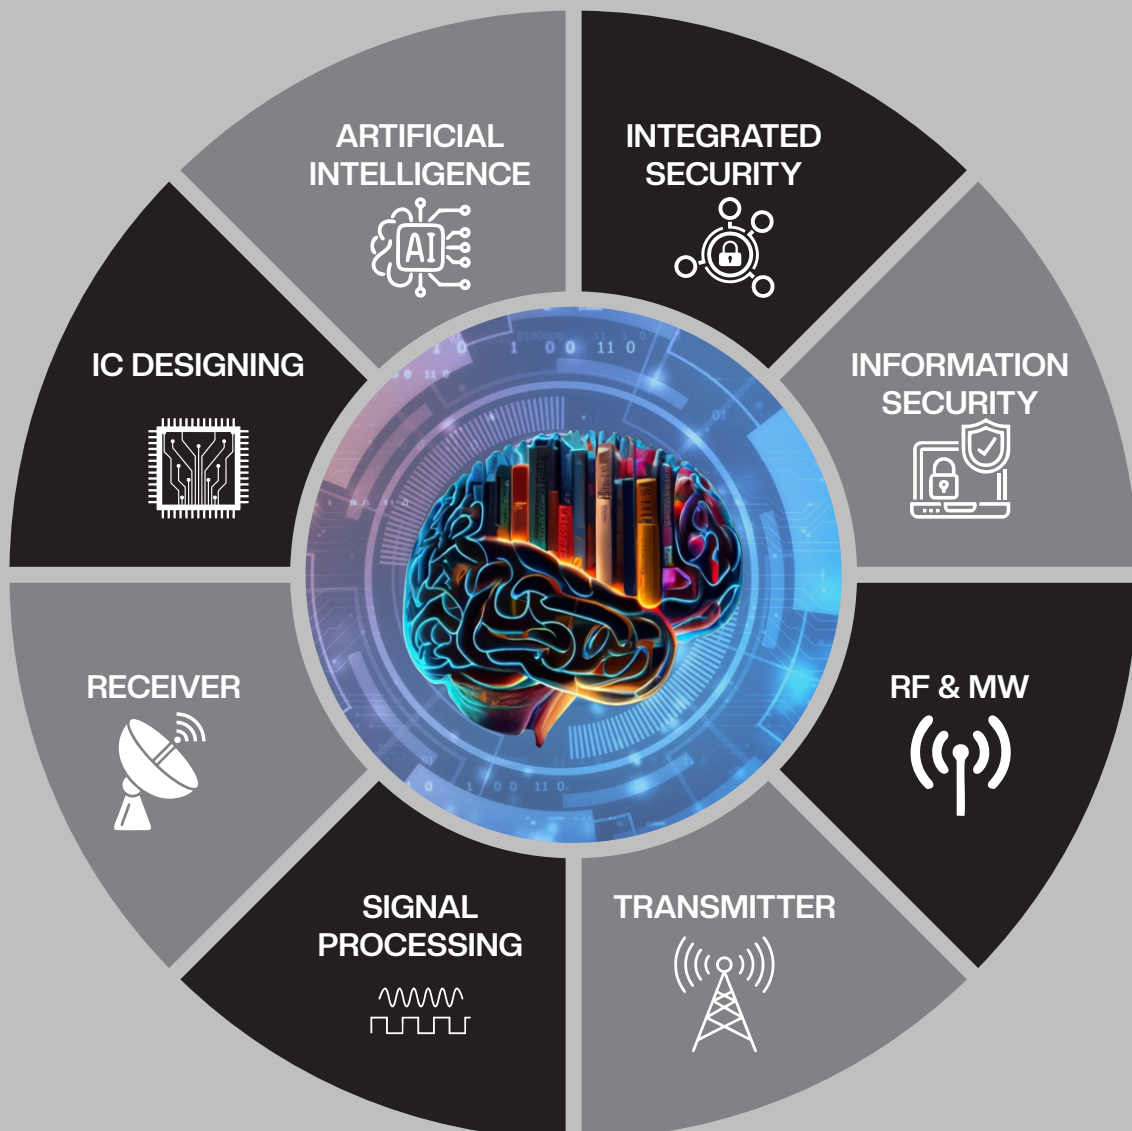

RADIOFREQUENCY & MECHATRONICS

IC DESIGNING & MANUFACTURING

OUR PROFILE

National Electronics Complex of Pakistan (NECOP) is a national level Research & Development (R&D) Organization specialized in the field of design and development of **Advance Electronic Systems**. NECOP mandated to transform technology-driven knowledge into modern innovative solutions with an objective to achieve technological self-reliance. To harness the opportunities, the foreign qualified human capital including PHDs, Master level Engineers, Technical Experts and a team of highly skilled professionals have made remarkable technological breakthroughs in the designing, development and implementation of various electronically intelligent systems & solutions for optimum exploitation of the technological advancements, NECOP has established following state of the art **Design Centers / Labs**:

NECOP VISION

"Transform technology driven knowledge, capabilities and expertise into modern innovative solutions with an objective to achieve technological self-reliance"

NECOP MISSION

"Designing & development of various electronically intelligent systems / solutions by setting-up high tech critical lab based environment and infusion of these technologies at local & international platforms"

NECOP
